

Charles: Is there anything you want to say to the public at large that would come to the website at this time?

Light Beings: As you know there are many predictions now about the chaotic things that are going to transpire on your planet and there is not much that we can possibly add to that this time; but one of the things that does not seem to be talked about very much is the individual's ability to make changes within themselves to avoid some of the difficulties that are going to be seen in the coming years. It is more important for the individual to begin to recognize conflicts within themselves because that is what is creating chaos throughout your entire planet, is the conflict with each individual within themselves, because the atrocities that you are hearing about, reading about, would never take place if one was recognizing the conflict that was creating the need for them to become obsessed with one belief system over another. In a soul that does not have conflict with the heart and the mind, there is no prejudice that exists, so there is not the need to destroy things that are not of their own belief. They are much more tolerant of the fact that there is great diversity on your planet, and the diversity can be of benefit if it is used properly.

So we would encourage anyone that is wanting to avoid being in the midst of the fear and the chaos to work at ways they can work within themselves to be at one with soul, body and mind.

Q: Feel secure in themselves?

LBs: Being secure within themselves can be misleading because the ego can convince you that you are going the right path without the soul having any say in it, and you would feel secure within yourself. What we are talking about is that balance within the soul and the ego — that we have said before — they shake hands with each other, they learn to work together as opposed to one or the other leading the way, because both are very necessary to exist on your planet, and necessary for there to be a wholeness within one.

Q: On the other side of fear there is joy?

LBs: On the other side of fear, yes, there is joy, there is even more than joy, there is solidity of peace. When there is no fear there is a peace that reigns within one, so that no matter the chaos externally one is able to maintain a balance and maintain a solidity. Once one has experienced, even for a short period of time, a complete disappearance of fear, then what has transpired within one is that ability to feel whole, comfortable within oneself because the ego is no longer ruling, but is also taking into consideration the soul's desires.
